

Job Title

- Back-End Developer

Job Goals

- Developing PHP based app and web.

Main Duties

At Aparat and Filimo, we are shaping the future of Iranian entertainment bringing moments of joy to our customers. We are looking for a strong Back-End Developer who has experience building web for enterprise and consumers. You will help design, build and maintain scalable applications and build the API infrastructure. You are self-motivated and like to work independently. You are passionate about building quality products and want to own projects end-to-end leading with the right design and development principles. You have strong communication and collaboration skills. You are a problem solver and like to challenge yourself with building the right solutions.

Requirements

- Proficient in PHP and MySQL.
- Familiar with each layer in the LAMP stack from application architecture and system infrastructure points of view;
- knowledgeable and experienced in PHP and MySQL programming.
- Self-starter, ability to work with minimal supervision. Equally skilled at working collaboratively in a team-oriented Environment.
- Excellent problem solving skills. Curious and adept at researching project-related issues and challenges.
